

Ubaid Desai

FULL-STACK DEVELOPER

Durban, South Africa · Ubaid786desai@gmail.com · +27 84 786 2260 · linkedin.com/in/ubaid-desai-34ba1a379 · github.com/GamerDubz

I build full production software end to end, not just marketing sites — privacy-first health apps live in New Zealand and South Africa, a browser game with a simulation engine built from scratch, and websites for local businesses through the digital agency I founded and run. Also spend time in QA and applied AI model evaluation, which keeps my code honest.

EXPERIENCE

Freelance Web Developer & QA Specialist

Jan 2026 – Present

Independent / Fiverr · South Africa

- Deliver custom web development projects end to end, from client scoping through deployment.
- Run software and application QA — identify, reproduce, and document bugs across web and mobile builds.
- Write structured, severity-classified bug reports so developers can triage and resolve fast.

Social Media Manager

Nov 2025 – Present

Private Retailer · Durban, South Africa

- Run day-to-day social media, content creation, and community engagement for a local retail brand.
- Plan and execute campaigns that drive customer acquisition and support in-store sales goals.

AI Training Specialist

2025 – Present

Alignerr & Outlier · Remote

- Evaluate and rank AI-generated responses to reinforce model accuracy, safety, and alignment.
- Write high-quality prompt/response training examples across reasoning, coding, and creative writing.

PROJECTS

Founding Senior Developer — Yana

Apr 2026 – Present

yana.co.nz

- Privacy-first medication-adherence app for NZ patients — Next.js, TypeScript, Supabase — shipped to native iOS/Android via Capacitor.
- Own the offline-first sync layer and RLS-enforced privacy model behind a 600+ page clinical library, a 449-medicine database, and a companion pharmacy dashboard.

Founding Senior Developer — DoseStreaks

May 2026 – Present

dosestreaks.co.za

- Local-first health companion PWA for SA patients — Next.js, TypeScript, Zustand, Supabase — shipped to native Android via Capacitor.
- Built on-device OCR for label scanning and SA-guideline vitals tracking; run full CI (lint, types, tests, build) on every push and PR.

Founder — Qroma

Feb 2026 – Present

qroma.digital

- Founded and run a digital agency delivering web development, digital marketing, and business automation.
- Run SEO/GEO strategy and direct AI-assisted creative production for client campaigns.

Solo Project — European Nights

Live · Jun 2026

european-nights.vercel.app

- Shipped a browser game solo — React 18, strict TypeScript, ~3,900 lines across a layered engine/state/UI architecture.
- Designed a seeded match-simulation engine (Poisson expected-goals model, two-legged knockouts).

EDUCATION

Higher Certificate in Mobile and Web Development, Computer Science

Feb 2026 – Nov 2027
